

Our teams of specially trained sanitation professionals focus on disinfecting the entire building, and have all the required training, equipment and materials to effectively treat all potentially contaminated areas.

You can expect a complete cleaning and disinfection of all interior surfaces using best practices for sanitization using the most current technologies and chemicals.

INTERIOR SURFACE SANITIZATION

Further to your request, I am pleased to provide you with our price list for interior surface cleaning & disinfection services. Aurum provides a complete range of vital services which can be customized to meet your specific needs, during this critical time.

Our cleaning methodology is highly effective in eliminating and neutralizing pathogens, viruses, and bacteria. As an extra layer of protection, we will apply a surface treatment that allows the treated surface to remain disinfected for extended periods of time. This creates a safer and cost-effective strategy for our clients.
